

Phally,
CEO and Founder of VP.Start

**Why do we need to prepare
today for the AI-infused
tomorrow?**

**Why do we need to
augment our skills and
mindset as we meet the
AI capabilities of tomorrow?**

**Why are many recent graduates
and tech employees concerned
that AI will “steal their jobs?”**

**How can we leverage the tools of
AI for our benefit instead of allowing
AI to leverage us?**

What are some specific ways to promote a resilient mindset and agile adaptability in the face of an unpredictable **AI future?**

The background of the slide is a dark, futuristic environment. On the left, a robotic hand with blue and silver segments is positioned as if interacting with a transparent, glowing interface. This interface contains a magnifying glass icon, a close button (X), a camera icon, and a microphone icon. A thin, glowing blue line extends from the hand towards the right. On the right side, a large, bright blue beam of light projects a massive, 3D white text graphic onto a dark, reflective floor. The text reads 'The SIMA Journey' in a bold, sans-serif font. A small figure of a person wearing a white hard hat and a safety vest stands on the floor, looking up at the projected text. The overall atmosphere is high-tech and visionary.

While no one can predict the AI future with perfect accuracy, what are some of the ways that **VP.Start foresees harnessing AI over the long haul?**

The

SMAP
