Innovation Through Technology

How does a developing country like **Cambodia** take on a role as a lead player in the **tech sector**?

Why do many international and local observers have a **negative** bias against our country, especially in the tech domain?

Why is **innovation** the key to raising the tech profile of **Cambodia** and overcoming the pain points of discrimination and prejudice?

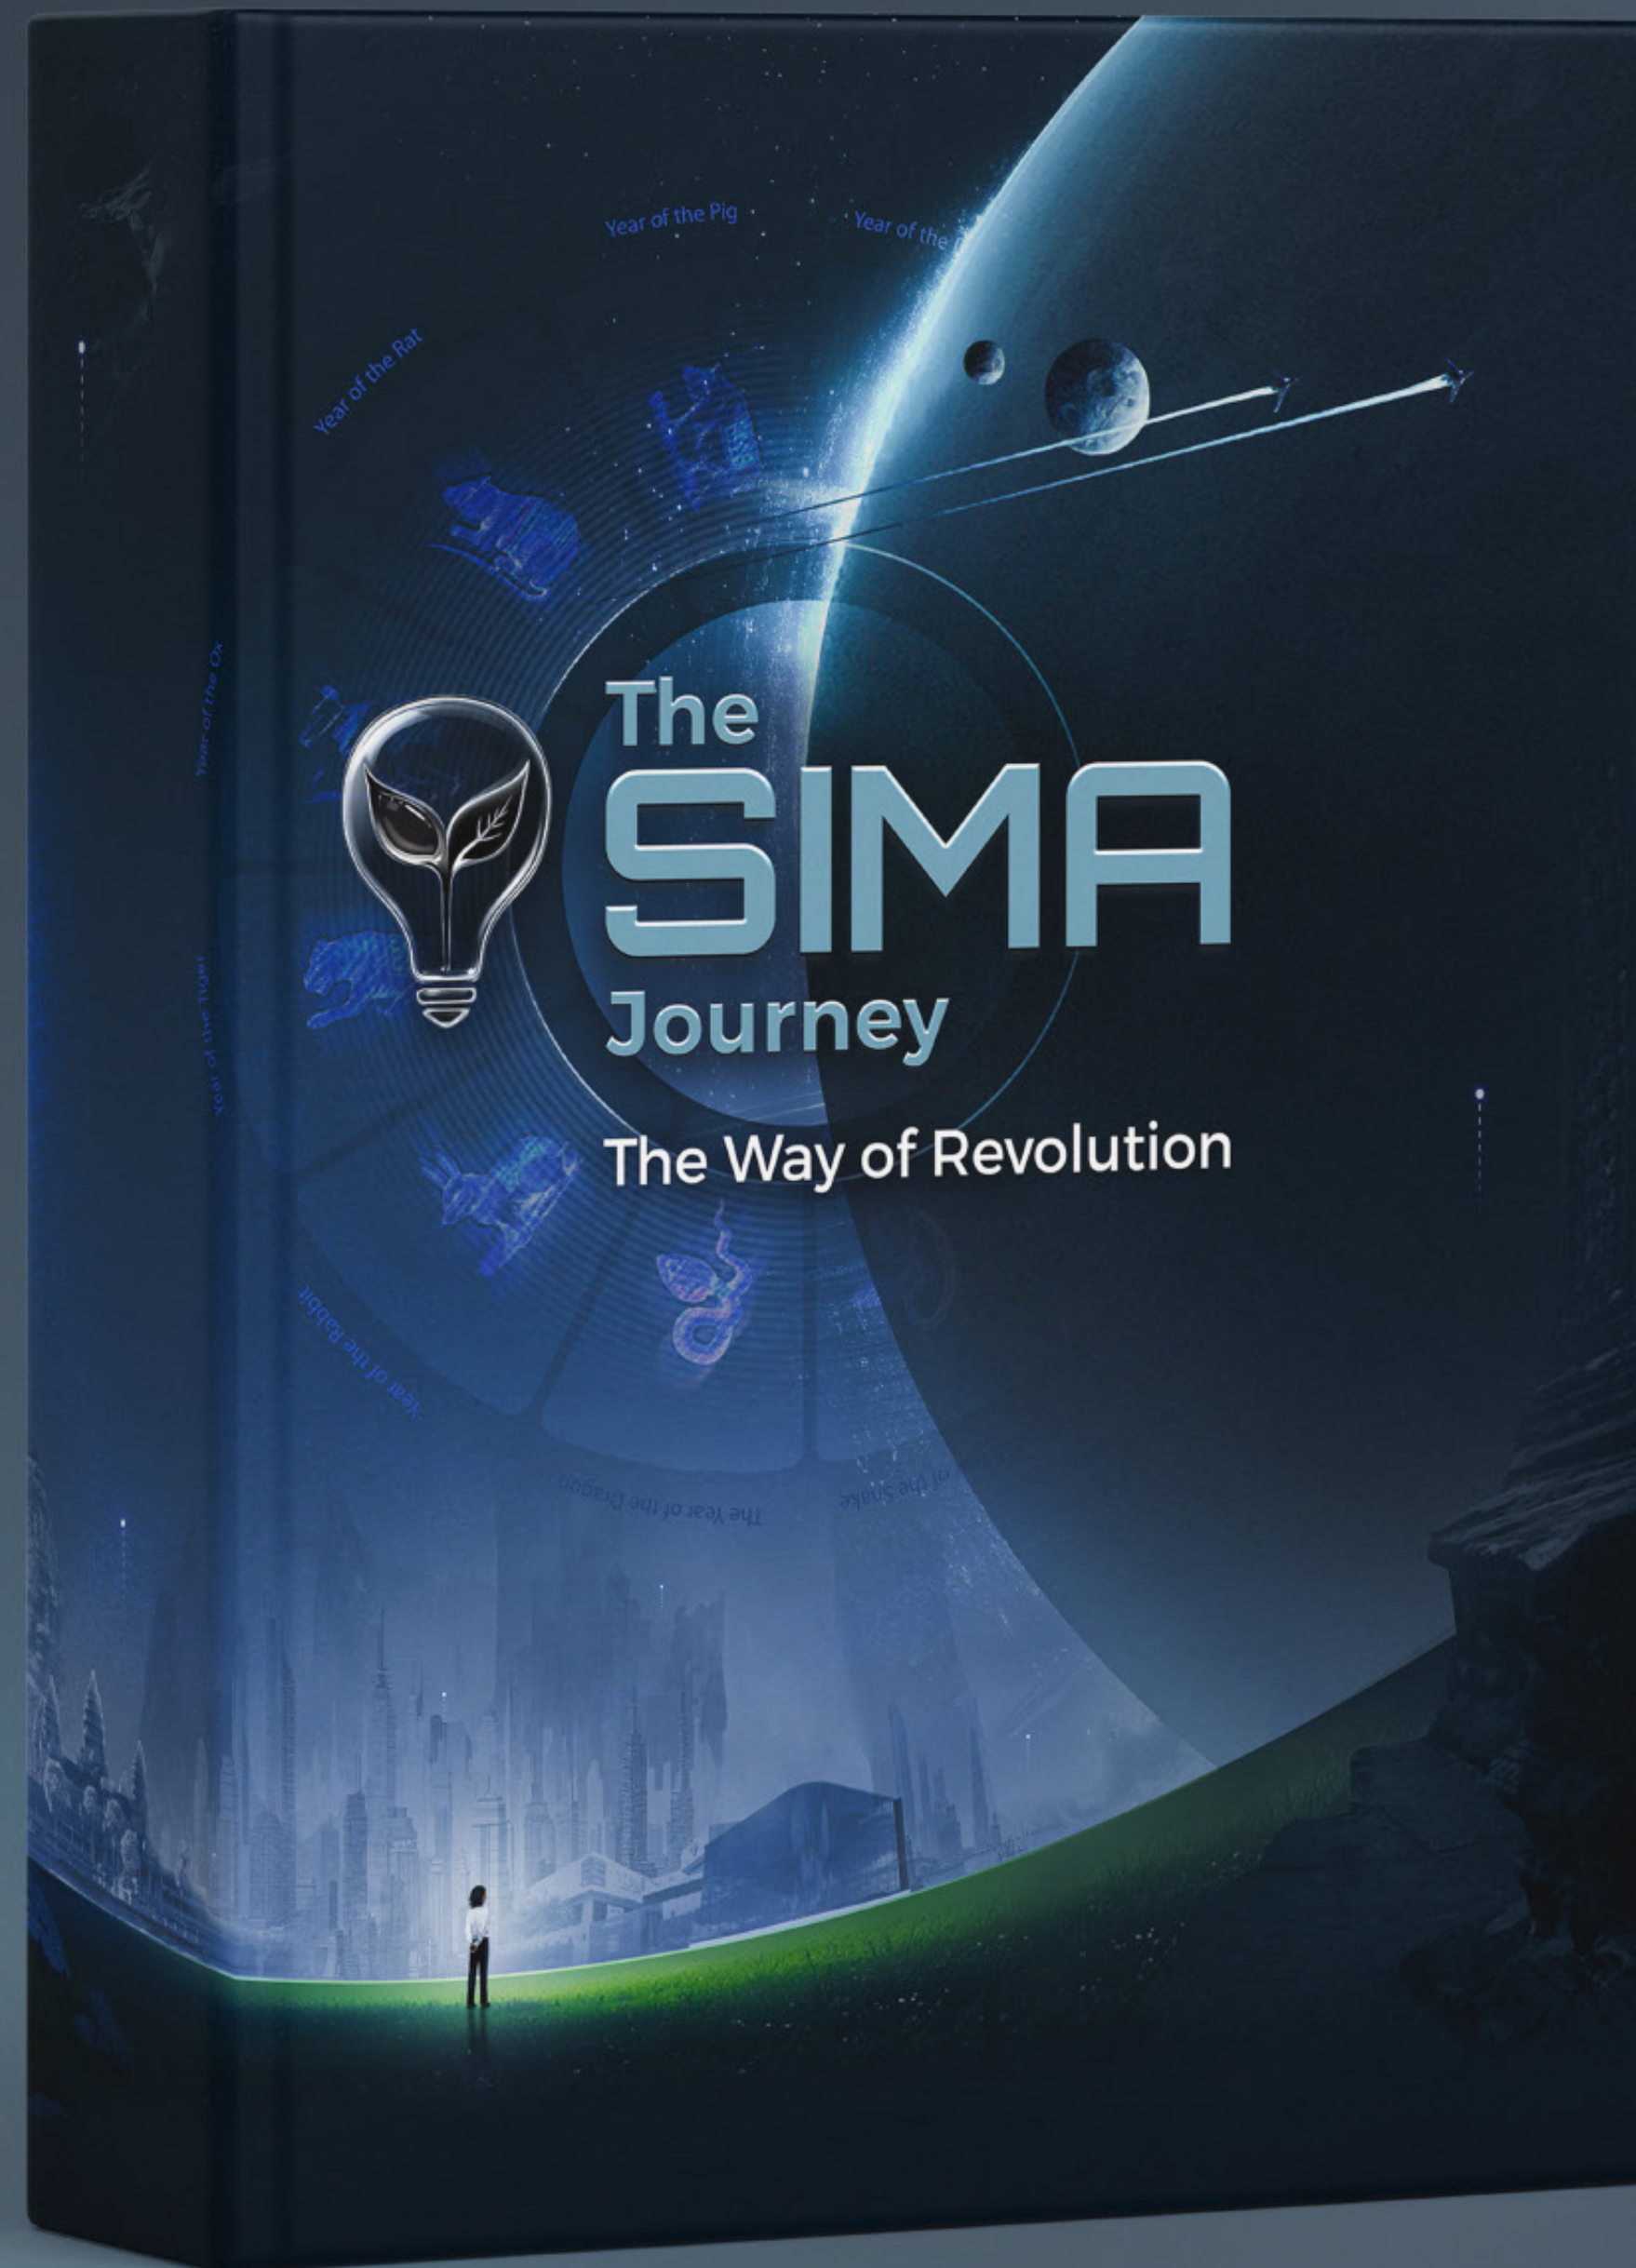

What are some specific
strategic methods and plans to bring
MADE IN CAMBODIA technology to
the world stage and global markets?

CAMBODIA

What future do we envision for the **Cambodian** tech industry and do we have the **creativity** and arrogance to achieve those lofty objectives?
